

Are you 15-24? been tested for the love bug?

1 in 14 people under 25
are already infected with Chlamydia...

...and not enough young people are getting tested

Chlamydia is....

*... highly
infectious*

... invisible

*... serious if
left untreated*

Say yes to the test!

Visit sayyestothesest.com for more information
and to access free, self-testing.
